“...what an amazing man - my Mom, Frances Mash Tindell, was a member of his 1948 graduating class at Hampshire and I was blessed to have him as my Chemistry professor while at Middle TN State Univ during 1980s. It was his wit and passion for learning that instilled a lifelong love for science for me - truly one of my all time favorite professors. He had such a positive impact on so many lives - we all loved him dearly... keeping the entire family and all those who loved him in our thoughts - Susan Terry

PD

I and two of my colleagues in the Biology Dept. took biochemistry under Dr. Brown in preparation to working on our doctorates. He was a wonderful teacher and an outstanding person. I have thought of him with fondness often over the years.

With heartfelt sympathy,

Patrick Doyle

LW

Dr. Brown was my first chemistry professor at MTSU in 1967. I enjoyed the class very much and he was one of my favorite professors. He had an easy way about him that made the subject less intimidating even though it was demanding. It was a small class in which he also taught the lab so he got to know his students quite well. He was always friendly and outgoing and answered our many questions with ease. Later, when I became first a doctoral student and then faculty member, he was always a friend and mentor. I have thought of him and Mary often. He was a wonderful person and will be missed.
