“ I have a NOW story of Jimmy....he SAVED my life yes...sadly he died.. trust me when I say his soul is very much alive. It all started..... I was coming off of methadone after being on it for 12 years I was on it for pain. NOT...Heroin I was addicted to pain medication! I was weaning and at the very end of my detox I heard a song on the radio quote... The stage.
I didn't even know who avenged sevenfold was ...i fell in love with song! My brother Tyler he plays the drums and he told me who the Rev was! So I looked into it a little bit start listening to the older albums like city of evil! and I was watching him on YouTube and I realize that he looks just like my deceased brother Waylon and just like my brother Tyler the drummer! Not long after that my son which was 8 years old and plays the drums had a dream about the Rev! After that experience many different spiritual encounters... I'm not crazy when I say this JIMMY saved my life !!!!!!!I was detoxing I came off the methadone hard I almost died but I started playing with the sticks a little bit I've never played music in my life! I learn how to spin my sticks first LOL imagine thatafter that that's all I did for months and months and I felt like shit every second of every day but I pulled through and I did that because of him! The only focus I had was playing the drums and I am 39 years old! I decided to add that in! This went on for about 6 months on and off I would feel the presence of the Rev in my life and as I started feeling better he faded away but I feel like he saved me! I would get into more detail but then they would probably lock me up in a mental institution in padded room so we won't go there LOL Just know that his soul is very much ALIVE JIMMY SAVED MY LIFE... Thanks Jimmy
